

NEW ADDITION TO OUR FAMILY OF SELF-TIPPING ROCKER BINS

Our **ROCKER TIP TRAILER** is designed for the fast and efficient transportation of a variety of goods. Its unique tipping ability, brought about by the disengagement of the locking mechanism, allows for fast dumping or unloading. The emptied bin then rocks back into its original position. This saves time and effort, as a load of 1.4 cubic meter can be off-loaded by one person in seconds. No hydraulic attachments are required, and any suitable tow vehicle can be used.
